Portfolio: [\[portfolio link\]](#)

PROFILE

UI/UX developer with four shipped web products, including a live e-commerce storefront used daily by a local business. Owns the full path from requirements and user flows to screens, HTML/CSS/JavaScript build and review of the implemented UI. Experienced at turning complex, multi-role workflows into clear, consistent dashboards, with a working grounding in ML from a capstone that fine-tunes code models.

EDUCATION

STME, SVKM's NMIMS University, Hyderabad — B.Tech CSE (Data Science)

2023 – Expected 2027

Narayana Junior College, Hyderabad — HSC: 90.3%

2021 – 2023

CORE SKILLS

- **UI/UX:** User-centered design, user flows, wireframing & prototyping, responsive web and mobile layouts, visual hierarchy, typography & spacing, component consistency, design systems, usability review
- **Design Tools:** Figma, Adobe Photoshop, Canva
- **Front-end:** HTML, CSS, JavaScript, TypeScript, React, Node.js, Streamlit
- **Backend & Data:** PHP, SQL, MySQL, Firebase (Firestore, Auth, Hosting), AWS (EC2, RDS), Python
- **ML & AI:** Scikit-learn, TensorFlow, Pandas, NumPy, LLM fine-tuning (LoRA), Power BI
- **Collaboration:** Requirements gathering, developer handoff & specs, Git, GitHub

PROJECTS

Vibe-Code Blueprint — AI App Builder (Capstone) | TypeScript, React, Node.js, LoRA · [GitHub](#)

2026–Present

- Designing the workspace UI for a plan-first AI app generator: an Agent mode with a live build timeline, an editable workflow-graph of the plan users approve in plain language before any code is written, and a drag-and-drop page builder with 116 elements, themes and motion presets.
- ML component: fine-tuned a 7B code model (Qwen2.5-Coder, LoRA) on 403 verified files, raising first-attempt success on backend and security components from 41% to 87% in held-out evaluation; verification failures surface with file and line.

E-Commerce Platform | HTML, CSS, JavaScript, Firebase · [kiranam.space](#) · [GitHub](#)

2025

- Designed and shipped the complete UI/UX for a real-time storefront, from product browsing and checkout to an admin order dashboard; live in production and used daily by a local business to receive orders.
- Built consistent customer and admin views with a shared component style, live order-status updates (Firestore onSnapshot) and a two-option sign-in (email/password, Google OAuth) kept deliberately low-friction for a non-technical owner.

NMIMS Non-Academic Issue Tracker | PHP, MySQL, HTML, CSS, JavaScript, AWS · [GitHub](#)

2025–2026

- Designed a responsive, 11-role complaint portal with a consistent red-gradient theme, role-specific dashboards and auto-highlighted navigation, turning a hierarchical process (Admin → Parent Staff → Sub-Staff) into clear screens.
- Mapped the end-to-end user journey from ticket creation to resolution with visible status history, attachments and feedback ratings; designed 6 matching email templates; migrated the system to AWS.

NMIMS Smart Event Management System | PHP, MySQL, JavaScript, Apache · [GitHub](#)

2025

- Cut event approval turnaround from 3–4 days to under 24 hours with a 9-level approval flow spanning Club Head, Faculty Mentor, School Head and Director, each with a role-aware queue showing only their pending actions.
- Designed step-level status tracking and query / reject / resubmit loops with notifications so users always know where a request stands and what to do next.

CERTIFICATIONS

- AWS Cloud Foundations (2026) | AWS ML Foundations (2025) | Google Cloud Computing Foundations + Skill Badges (ML APIs, App Dev) | Cisco Networking & OS (2025) · **Credentials:** credly.com/users/vikram-gumudavelli

ACHIEVEMENTS AND POSITIONS OF RESPONSIBILITY

- **Best Backend Award — Hackathon Challenge (2025):** among 15+ teams, delivered a working solution within 12 hours.
- **Head, SDC — Sankalp Club (2025–Present):** led campus-wide social events with a 20+ member team and outreach reaching 300+ students; designed event posters and communications in Canva and Photoshop.
- **NMIMS Indore Hackathon — cleared Round 3:** built an AI advertising-agency platform that generates posters and ad creatives on request for any company, designing the brief-to-poster flow and the generated-output review screens.
